SUMMARY DESCRIPTION OF BUSINESS

What is our business?

Libero is engaged in the acquisition and exploration of mineral properties. The Company holds a collection of porphyry projects in the Americas. The portfolio includes the Mocoa porphyry copper-molybdenum deposit in Colombia, the Esperanza porphyry copper-gold project in San Juan, Argentina and the Big Red, and Big Bulk porphyry copper projects in the Golden Triangle, BC, Canada.

Recent Developments

On February 2, 2023 Libero announced the completion of the new San Jose access to the Mocoa porphyry copper-molybdenum project located in Putumayo, Colombia. The access is 2,100 metres in length for the transport of drills and supplies, which eliminates expensive helicopter support for drilling activities around the deposit area.

On January 16, 2023, Libero provided the drill results from the summer 2022 drill program at the Big Red project in British Columbia.

On December 6, 2022 Libero Copper, together with the National University of Colombia, extracted metallic copper from pulp from the Mocoa copper-molybdenum deposit in Colombia. It is the first copper produced in Colombia from a deposit in Columbia. The press release issued December 6, 2022 has further details.

On November 29, 2022 Libero entered into a “Cooperation Framework Agreement for Participation and Generation of Shared Benefits” for the exploration for the Mocoa deposit with the community of Montclar, the only community near to the Mocoa deposit. The press release issued November 29, 2022 has further details.
